

## Saito Vibraphones

The best sound quality for the best performance

Saito only uses the highest quality Honduras Rosewood or Chinese Padouk as bar material for their xylophones. Saito's original "Backbone Frame" is extremely durable and is designed to sustain the shock of transport and rough handling.

All DC models can be run on a battery pack so there is no longer need for on-site power, avoid having those long power cords getting in your way. Saito VS-180DC

- Great sound with uniform bars.
- An excellent student model. Saito VS-330DC
- Professional model with long pedal.
- Graduated bars.
- Fantastic Sound! Saito VS-1500DC The resonance sound full of presence which wide keyboards emits, VS-1500 have been popular among a lot of vibraphone players all over the world. U-shaped foot pedal helps pedal play easy.
